

***K-12 Mathematics:  
What Should Students Learn and When Should They Learn It?***

**Announcement of a National Conference**

The recent development and release of K-12 mathematics curriculum standards by influential national groups (Achieve, American Statistical Association, College Board, and the National Council of Teachers of Mathematics) represents a unique and important window of opportunity to promote and stimulate collaboration among users of standards. Thus, the Center for the Study of Mathematics Curriculum (CSMC) has organized a national conference focusing on K-12 mathematics curriculum standards. The conference will feature presentations on the most recent mathematics curriculum recommendations and engage “users” of standards (state and district curriculum specialists, textbook and assessment publishers, K-12 district and teacher leaders, and representatives from higher education and business) in discussions about implications for their work.

**Date:** Feb. 5-6, 2007

**Site:** National Rural Electric Cooperative Conference Center (near NSF building)

**Organizer and Primary Sponsor:**

The Center for the Study of Mathematics Curriculum (CSMC)

**Co-Sponsors:**

Achieve, Inc.

American Statistical Association (ASA)

The College Board

Mathematical Association of America (MAA)

National Council of Teachers of Mathematics (NCTM)

**Conference Website:**
